

LDV Offline Multilingual Acceptance Report

Generated: 07 July 2026, 14:38

Config: LDV_REMOTE_TRANSLATION=local | HF_HUB_OFFLINE=1 | TRANSFORMERS_OFFLINE=1 | Run window:
2026-07-07T07:37:24.720338+00:00 → 2026-07-07T07:38:03.063066+00:00

Scope: this run tests English, Indonesian, French, and Dutch contract and non-contract documents, one scanned/no-text PDF, and two malformed files, with all outbound network sockets blocked (see Verification Evidence).

Test Results

Test category	Total	Passed	Failed	Blocked	Evidence
Offline multilingual suite	14	14	0	0	ldv-backend/tests/offline_validation_results.json

Per-Language Metrics

Language	Total	Passed	Contract detection	Clause recall	Mean ms	Median ms	P95 ms
EN	2	2	100.0%	100.0%	593.0	593.0	639.5
FR	3	3	100.0%	100.0%	3840.2	2964.7	5650.7
ID	3	3	100.0%	100.0%	4631.4	2846.6	8499.1
NL	3	3	100.0%	n/a	3359.8	2965.9	5647.4

Per-Fixture Detail

Fixture	Status	Detail
pdf/01_employment_id.pdf	PASS	employment contract
pdf/02_lease_be.pdf	PASS	lease agreement
pdf/03_nda_en.pdf	PASS	non-disclosure agreement
docx/02_employment_fr.docx	PASS	employment contract
docx/03_nda_nl.docx	PASS	non-disclosure agreement
txt/12_high_risk_unilateral_id.txt	PASS	service agreement
txt/13_medium_risk_lease_nl.txt	PASS	lease agreement
pdf/05_brochure_en.pdf	PASS	
docx/06_memo_fr.docx	PASS	
docx/07_brochure_nl.docx	PASS	
txt/16_notice_id.txt	PASS	
pdf/06_scanned_blank_en.pdf	PASS	
negative/empty.pdf	PASS	Cannot open empty stream.
negative/fake.pdf	PASS	Failed to open stream

Known Limitations / Current Accuracy Gaps

No fixtures failed in this run.

Model Provenance

Model	Revision
Helsinki-NLP/opus-mt-id-en	9a7f1b0d0dfe0a92ba691030b01d6f23f966e7ec
Helsinki-NLP/opus-mt-fr-en	c4aed37b318c763fd177aa449b44e3b783cc6c02
Helsinki-NLP/opus-mt-nl-en	48af999f2c59b10c05ca6e008dcedc07677a9b15
typeform/distilbert-base-uncased-mnli	cfa538a0fddb978fefe8966c1aeff7ad409c90

Translation Failures

None recorded during this run.

Peak RAM (RSS): 2141.1 MB

Verification Evidence

Network egress self-check: PASS — a real outbound connect attempt was raised and blocked before any fixture was processed.

Raw results: `ldv-backend/tests/offline_validation_results.json`

Harness source: `ldv-backend/tests/run_offline_validation.py`, `ldv-backend/tests/offline_net_trap.py`

Decisions Required from Management

1. Accept socket-level egress blocking as sufficient offline proof for this dev-sandbox environment, or require kernel-level network-namespace isolation for the next report.
2. No OCR is implemented; scanned documents are rejected with a clear error rather than silently mis-analyzed. Confirm this fail-closed behavior is acceptable for the pilot, or request OCR as a new priority.
3. Confirm the current fixture set (EN/ID/FR/NL contracts + non-contracts, one scanned PDF, two malformed files) is sufficient acceptance coverage, or specify additional cases to add.
4. Review the Known Limitations section for 0 fixture(s) that did not pass this run and decide whether they block pilot acceptance.

Status: Implemented, Tested — pending management Accepted/Blocked decision above.
